

a2

3. (Amended) The pesticidal composition of claim 1, wherein the carrier is selected from the group consisting of isoparaffinic hydrocarbons, methyl salicylate, menthyl salicylate, isopropyl alcohol, and benzyl alcohol.

a3

5. (Amended) A synergistic contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier selected from the group consisting of isoparaffinic hydrocarbons, methyl salicylate, menthyl salicylate, isopropyl alcohol, and benzyl alcohol, rosemary oil, and optionally, one or more plant essential oils, selected from a group consisting of eugenol, phenethyl propionate, peppermint oil and benzyl alcohol, with piperonyl butoxide, or sesame oil and/or soybean oil.

a4

8. (Amended) A contact and repellent pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil, optionally with[and without] one or more plant essential oil compounds selected from the group consisting of eugenol, phenethyl propionate, peppermint oil and benzyl alcohol, and one or more conventional pesticides.

Please add claims 12 through 45, as follow

--12. A synergistic contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil, sesame oil, soybean oil and optionally, one or more plant essential oils, selected from the group consisting of eugenol, phenethyl propionate, peppermint oil and benzyl alcohol.--

See B4

--13. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 12.--

--14. A synergistic contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil, sesame oil and optionally, one or more plant essential oils, selected from the group consisting of eugenol, phenethyl propionate, peppermint oil and benzyl alcohol.--

Sub B5 --15. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 14.--

--16. A synergistic contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil, soybean oil and optionally, one or more plant essential oils, selected from the group consisting of eugenol, phenethyl propionate, peppermint oil and benzyl alcohol.--

Sub B6 --17. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 16.--

--18. A contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil, peppermint oil, eugenol and phenethyl propionate.--

Sub B7 --19. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 18.--

--20. A contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil, peppermint oil, eugenol, phenethyl propionate and methyl salicylate.--

Sub B8 --21. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 20.--

--22. A contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil, peppermint oil, eugenol, phenethyl propionate and menthyl salicylate.--

Sub B9 --23. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 22.--

--24. A contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, rosemary oil, peppermint oil, eugenol, phenethyl propionate and isopar M.--

Sub B10 --25. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 24.--

--26. A synergistic contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil, peppermint oil, menthyl salicylate and soybean oil.--

Sub B11 --27. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 26.--

--28. A synergistic contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil, peppermint oil, and soybean oil.--

Sub B2 --29. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 28.--

--30. A synergistic contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil and soybean oil.--

Sub B3 --31. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 30.--

--32. A contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil, peppermint oil and L-menthyl iso-valerate.--

Sub B4 --33. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 32.--

--34. A synergistic contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil, peppermint oil, soybean oil and L-menthyl iso-valerate.--

Sub B15 --35. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 34.--

--36. A synergistic contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil, peppermint oil, benzyl alcohol and soybean oil.--

Sub B16 --37. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 36.--

--38. A synergistic contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil, peppermint oil, soybean oil and sesame oil.--

Sub B17 --39. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 38.--

--40. A synergistic contact pesticidal composition for the control of household pests, including cockroaches and ants, comprising, in admixture with an acceptable carrier, rosemary oil, peppermint oil and sesame oil.--

Sub B18 --41. A method for controlling household pests, including cockroaches and ants, which comprises applying to the location where control is desired a pesticidally-effective amount of the composition of claim 40.--
